

WF75 ACADEMY / INTERNAL TRAINING ONLY

HVAC Prospect Outreach Training

A practical training handout for the AI Workflow Clarity Sprint: how to explain the offer, rehearse outreach, handle objections, and preserve the no-send boundary.

Current Status

What exists

20 public-source prospects, a first 5 batch, QA-reviewed internal outreach packet, and a simulation lab.

What this enables

Training, rehearsal, owner approval-card prep, and safer manual outreach planning.

What it does not authorize

No outreach, sending, calling, SMS, CRM import, payment links, customer data, or production access.

Operating Flow

Every external step stays owner-gated until Randall approves exact batch, channel, and copy.

Offer Frame

Plain-English Offer

A fixed-scope 5-day review of one intake or callback workflow. It returns a practical map and improvement checklist without system access, customer data, production changes, or outcome guarantees.

Do Not Sell This As

- guaranteed revenue or booked jobs
- live automation build
- CRM migration
- text automation
- call recording setup
- emergency dispatch coverage
- legal, compliance, or security certification

First Batch Under Review

#1

Olive Air & Heating

Gilbert / high confidence

Possible fit for an intake-speed and callback-handoff review because the public site leans hard into instant scheduling, live availability, and emergency responsiveness.

<https://oliveairandheating.com/contact/>

#2

Instant Heating and Air

Phoenix / high confidence

Possible fit for reviewing emergency-call handling and estimate handoff because the site advertises immediate booking, instant estimates, and 24/7 response.

<https://instantheatingandair.com/book.html>

#3

Frozen Cactus Air

Mesa / high confidence

Possible fit for reviewing emergency-intake and direct-tech callback workflows because the company promotes same-day service, multi-city coverage, and direct technician contact.

<https://frozencactusair.com/>

#5

Cold Stinger Heating & Air Conditioning

Phoenix / high confidence

Possible fit for a missed-call and follow-up review because the site openly promotes emergency response, maintenance-plan volume, and pricing-related self-serve flows.

#6

Norris Air

Gilbert / high confidence

Possible fit for a workflow review around modern-system service intake and owner-visible follow-up because the public site pairs older local tenure with newer-system positioning.

<https://coldstingerheatingandairconditioning.com/contact-hvac-phoenix-az/>

Safe Copy Standard

Rehearsal Copy

I was looking at {business_name}'s public HVAC service pages and noticed you already emphasize fast service, scheduling, and customer response. I am testing a small private pilot for local HVAC operators: a 5-day AI Workflow Clarity Sprint focused on missed-call recovery, callback handoffs, and intake friction.

Unsafe Patterns

- you are losing leads
- we can increase bookings
- AI will fix your missed calls
- guaranteed ROI
- send call recordings
- send CRM access

Readiness Gates

Readiness gates

1

Explain offer without ROI or AI hype

2

Pass data, channel, and claim discipline drills

No send authority

until exact approval

Simulation Map

#	Simulation	Difficulty	Category
1	Locate The Truth Surface	foundation	source
2	Explain The Offer Without Hype	foundation	offer
3	Pick The Safe Outreach Angle	foundation	copy
4	Repair Unsafe Copy	core	copy
5	Channel Boundary	core	channel
6	Prospect Replies: Send Details	core	reply
7	Prospect Offers Call Recordings	core	data
8	Discovery Call Opening	core	call
9	Objection: We Already Use ServiceTitan	advanced	objection
10	Objection: How Much Revenue Will This Add?	advanced	objection
11	Qualification Decision	advanced	qualification
12	Build The Approval Card	advanced	approval

Scoring Rubric

Category	Ready Standard
offer clarity	explains the Sprint in plain English without hype
scope control	states what is not included
channel discipline	does not send, call, text, or automate without approval
data discipline	blocks customer data, credentials, recordings, and production access
claim discipline	avoids ROI, revenue, booked-job, emergency, legal, compliance, and security claims
prospect judgment	uses public fit signals cautiously
escalation	routes out-of-scope requests back to Veritas/Randall

Minimum readiness: no category below 2. Claim, data, and channel discipline must score 3. This still does not approve outreach.
